

Frontiers in T1D Cure

Advanced Grants for Leading Researchers
Two stages grant

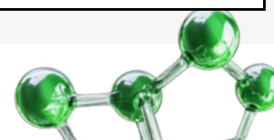

2025

Full Proposal Template

Note 1: Figures, images and references must be attached at the end of this document (two pages maximum). **Note 2:** To finish your memory, generate a non-editable pdf file.

Title	
Principal Investigator	

Publishable executive summary. Relevance to type 1 diabetes (maximum 300 words). The summary should contain background, hypothesis and aims, methods, expected results and potential impact.

Scientific objectives (maximum 8.000 characters including spaces)

Required technology. Available resources for carrying out the project at the host institution.
(maximum 8,000 characters including spaces)

What are the innovative aspects of the project and the technologies that will be used? How does this research differ from similar ones? (maximum 4,000 characters including spaces)

Expected results and potential impact and applicability of the project results for patients, the scientific-medical community, and society in general. (maximum 4,000 characters including spaces)

Translational approach of the research to be developed. Expected future steps to take the innovation generated in the project to more advanced stages in the development of potential drugs (maximum 3,000 characters including spaces)

Detailed work plan: WorkPlan with methodology, main milestones and deliverables, and implementation schedule. (maximum 8,000 characters including spaces)

DiabetesCERO funding call 2025
